

Portable UAV Detection, Positioning & Spoofing Device

R-Warder-300A

R-Eye

R-Shield

R-Warder

R-Glow

『 KEY BENEFITS 』

The product is an integrated portable device that offers comprehensive long-range surveillance and interception capabilities. It combines functions, for instance, UAVs detection & positioning, UAVs remote pilot detection & positioning, flight path display, pre-set black-and-white list management, and navigation spoofing.

Through in-depth analysis of UAV signals, it can accurately detect the relevant information of all UAVs within the warning range, including the positioning information of the corresponding UAV remote pilot. Moreover, it can generate navigation spoofing signals to effectively divert UAVs, achieving efficient control in various scenarios.

- ▶ Trackable Trajectories
- ▶ Black & White List Support
- ▶ Portable Deployment
- ▶ Superb Battery Endurance
- ▶ Directional Diversion

Box closed state

『 TECHNICAL SPECIFICATIONS 』

Number of Simultaneously Detectable UAVs

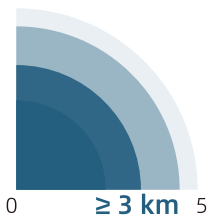

Number of Simultaneously Spoofing UAVs by GNSS

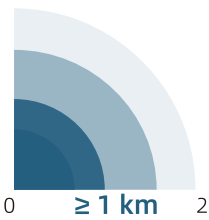

Battery Endurance

Detection Range

Navigation Decoy Range

Supported Frequency Bands of Detection	2.4GHz、5.8GHz	CUSTOMIZABLE
Supported Frequency Bands of Navigation Spoofing	GPS L1、GLONASS L1、BDS B1	CUSTOMIZABLE
Screen Size	10.1 " (1280 ×800)	CUSTOMIZABLE
Charging Method	DC12.6V/10A power adapter	
Power Consumption	≤ 150 W	
Operating Temperature	-20°C to 65°C	
Weight	≤ 20 kg (battery, antenna, charger included)	
Enclosure Dimensions	430 mm × 345 mm × 188 mm ± 5 mm	
Ingress Protection Rating	IP 65 (box closed state)	

『 INDUSTRY APPLICATIONS 』

- Security & Counter-terrorism in the Oil & Petrochemical Industry
- Security & Counter-terrorism in the Power Industry
- Government & Security Agency
- Civil Aviation Airport & Logistics Base
- Large-Scale Event & Sport Competition
- Urban No-Fly Zone Airspace Security
- Business & Personal Privacy Protection
- More Industry Solutions
